

NMMSS Training for U.S. Nuclear Operators

The Nuclear Materials Management & Safeguards System (NMMSS)

Congratulations!

You are a participant of the online 3-day Nuclear Materials Management & Safeguards System (NMMSS) Training for U.S. Nuclear Material Operators (NMM-112) launch. This online NMMSS training course is a virtual hybrid 3-day class that will implement video training segments, live question, and answer segments, and two take-home quizzes.

The training course will begin at 10:30 am (EST). This course will utilize the Zoom virtual meeting platform. Please log-in 15 minutes prior to the beginning of the course to verify audio and video connectivity. If any technical issues arise, support information is available at the bottom right of this page. Each day, there will be three short breaks as well as a lunch break. The course will adjourn at 4:00 pm (EST).

The take-home quizzes will be given the first two days of the course. The quizzes should be completed and emailed to the course instructor by 9:30 pm (EST) the following day. Quiz results will be reviewed at the beginning of the next session through live question/answer discussions.

To maximize your experience with this training, it is recommended that you visit the reference materials website prior to the first day of class. This website contains course information, course agenda, NMMSS reporting guidance documents, and additional reference site links. The link to the reference materials website is:
